TROJAN TRB-547 "No-Sweat"

Industrial Aerosols

Insulation Spray

DESCRIPTION: Foam-aerosol.

USED FOR: Preventing condensation on cold water pipes, condensers, cold air ducts, refridgeration lines, water tanks, valves and fittings.

TRB 547 is used in industrial processing, commercial, service and domestic areas of application.

SPECIAL BENEFITS:
Easy to apply, ready to use.
Non-flammable.
Durable.
Flexible.
Water resitant.
Dries to a clean white insulating surface.
May be wrapped or painted over.
May be applied to any metal, painted or ceramic surface.

DIRECTIONS:
Shake can before using.
Wipe surface dry before applying.

For best results, first apply a thin coat in short bursts, from approximately 12 inches away.
Allow a few minutes to set and dry, then re-coat from a distance of 6 inches, building up to desired thickness.

Do not spray when cold or tip may clog.
Clear valve after use by inverting can and spraying a few short bursts.

Package Size: (code) **12x1 Aerosols 654721**
