

ROJAN

TRL-639 Tro-Coat MPPC

Technical Data

Multi Purpose Protective Coating

DESCRIPTION: Amber liquid, mild solvent odour.

USED FOR: TRL 639 Tro-Coat MPPC is a multi-purpose anti-corrosion protective coating and release agent. It is designed for the surfaces of truck beds, commercial snow plows, spreaders, buses, graders, automatic shovels, cement forms, wheel barrows and all types of road equipment (pavers, shovels, rakes, graders, rollers and trucks). It is also an excellent rust protection as an undercoating on vehicle undercarriages and blades of lawn mowers.

SPECIAL BENEFITS:

- Prevents rust and corrosion
- Protects paint
- Protects costly equipment in outside storage
- Prevents salt, sand etc., from sticking to surfaces
- Water resistant and waterproof
- Prevents build-up of asphalt on asphalt operation vehicles
- Prevents concrete from sticking to forms and mixers
- May be used at temperatures below freezing
- No harmful effects on asphalt or concrete
- Excellent under harsh conditions.

DIRECTIONS:

Snow Plows:
Coat rotor blades and snow chute daily.

Sand and Salt Spreaders:
Spray before use. This will not only permit the sand and salt to flow freely but will also greatly reduce the corrosive effect of the salt.

Pay Loaders, Graders, Shovels & Earth Moving Equipment:
Spray trucks, graders rollers, and pavers daily before use. Rakes and shovels used for spreading asphalt should be dipped in Tro-Coat MPPC before use.

Package Size: 210 L 663916 20L 663911 4x4L 663906
